

300gr

## White Plus

White Plus is a 100% natural Pigment, that intensifies the white color of the feathers, both in white canaries and in red mosaics.

Must be mixed in the breeding stock, 15gr of product per kg of eggfood. Depending on the type of bird, the mode of use varies:

- In White Canaries: administer White Plus from mating until the end of the moulting.
- In Red Mosaic: we will administer it from mating until 7 weeks after the birth of the chicks.

100ml

## BLZ Plus

It is a product specifically designed to achieve an EXTRA ENERGY CONTRIBUTION.

- During the racing season; indispensable if we need an extra supply of energy, increase resistance and delay fatigue; give it for 3 consecutive days, starting on Tuesday (assuming the setting is Saturday). The recommended dose is 1ml per liter of water.
- During breeding it can be used a maximum of 3 times per week, depending on the needs, maintaining the dose of 1ml per liter of water.
- During the moulting, it is recommended to use it twice a week.

500gr

## Probibac Forte

The perfect combination of Probiotics, Prebiotics, Electrolytes, Vitamins and Amino Acids, which guarantees a perfect intestinal flora throughout the year, even in periods of high stress.

Specifically developed for Pigeons.

- In Pigeons, 1 tablespoon (=7,5g) per 1 kg of food. It is recommended to previously moisten the food.

500gr / 150gr

## Probibac Bird

The perfect combination of Probiotics, Prebiotics, Electrolytes, Vitamins and Amino Acids, which guarantees a perfect intestinal flora throughout the year, even in periods of high stress.

Specifically developed for Birds and Cage Birds.

- In birds, 1 tablespoon (=7,5g) per 1,5kg of food. It is recommended to previously moisten the food.

100Caps

## Probibac Caps

The perfect combination of Probiotics, Prebiotics, Electrolytes, Vitamins and Amino Acids, which guarantees a perfect intestinal flora throughout the year, even in periods of high stress.

Specifically developed for Pigeons

- In Pigeons, should be used twice a week; 1 cap per pigeon.

500ml

## Super Elixir B12

Pure B12 vitamin, developed to stimulate and increase endurance in Racing Pigeons. Improve the metabolism of proteins, fats and carbohydrates, providing an extra dose of energy.

- The general dose is 15 ml per liter of water.
- During the racing season, administer for 2-3 consecutive days ending the day before the flight.
- During the breeding season, twice a week.
- After treatments or periods of illness, 3 times a week.

500ml / 250ml

## Super Elixir B12 Bird

A product based on pure B12 vitamin, specifically developed to stimulate and increase endurance in Birds. It focuses on improving the metabolism of proteins, fats and carbohydrates, providing an extra dose of energy.

- The general dose is 15 ml per liter of water.
- During exhibitions, 3 consecutive days before the start.
- During the breeding season, twice a week
- After treatments or periods of illness, 3 times a week

100Caps

## Recovery Caps

Is a complete solution for the total recovery of pigeons in record time. It replenishes the energy reserves, which will be almost exhausted after the flights

- In Pigeons, we must give 1 capsule per pigeon just after the flight. In the event that the test is very hard, another capsule can be administered the next day.

100ml

## Broncho Plus

It is a formula based on aromatic plants, focused on the care and optimization of the airways, with the aim of improving respiration and therefore blood oxygenation, achieving a significant improvement in physical performance and endurance during the flights.

- In Pigeons, during the racing season, we must give 2ml of Broncho Speed per liter of water, 2-3 times a week (before basketing).

100caps

## Hen Fertility caps

It is a treatment specifically designed to correct fertility problems in females pigeons, increasing the desire to mate, regulating laying cycles and increasing the percentage of fertilized eggs.

- 3 weeks before mating, start a treatment consisting of 1 capsule per pigeon 3 times a week. During these 3 weeks, try to get the pigeon to sunbathe as much as possible (this will help a better reaction and assimilation of vitamin E). Once paired, reduce the treatment to 2 times per week.

100Caps

## Cock Fertility caps

Treatment specifically designed to correct fertility problems in males pigeons, increasing the desire to mate, increasing vitality and increasing the percentage of fertilized eggs.

- 4 weeks before mating, start a treatment consisting of 1 capsule per pigeon 3 times a week. During these 4 weeks, we will try to get the pigeon to sunbathe as much as possible (this will help a better reaction and assimilation of vitamin E). Once paired, reduce the treatment to 2 times per week.

1000ml / 500ml / 250ml

## Boost-Amin

Combination of amino acids, B vitamins and electrolytes, enriched with anis, scientifically developed for racing pigeons.

- Can be used mixed in food or drinking water.
- Racing season: 15ml per 1 liter or 1 kg of food for 3-4 days a week.
- Breeding season: 15ml per 1 liter or 1 kg of food for 3 days a week.
- Moulting season: 15ml per 1 liter or 1 kg of food for 2-3 days a week.

1000ml / 500ml / 250ml

## Boost-Amin Bird

Combination of amino acids, B vitamins and electrolytes, enriched with anis, scientifically developed for cage birds.

Can be used mixed in food or drinking water.

- Exhibition season: 10ml per 1 liter (1ml per individual drinker of 100ml) or 1 kg of food for 3 days a week.
- Breeding season: 10ml per 1 liter (1ml per individual drinker of 100ml) or 1 kg of food for 3-4 days a week.
- Moulting season: 10ml per 1 liter (1ml per individual drinker of 100ml) or 1 kg of food for 2-3 days a week.

1000ml / 500ml / 250ml

## Superchol Plus

Scientifically developed to promote liver function in pigeons, alleviating the brutal overload it receives and optimizing its performance.

It can be used mixed in food (pre-moistening the food with oil or lemon juice) or mixed in drinking water.

- Racing season: mix 10 ml in 1 liter of water or 750 gr of food 3 times a week.
- Breeding season: mix 10 ml in 1 liter of water or 1 kg of feed 2 times a week.
- Moulting season: mix 10 ml in 1 liter of water or 1 kg of food 2-3 times a week.

1000ml / 500ml / 250ml

## Superchol Plus Bird

Scientifically developed to promote liver function in birds and cage birds, alleviating the brutal overload it receives and optimizing its performance.

It can be used mixed in food (pre-moistening the food with oil or lemon juice) or mixed in drinking water.

- Exhibitions season: mix 10 ml in 1 liter of water or 1 kg of food 3 times a week.
